Ondro, W.J., R.A. Bohning, H.M. Stewart, and G.R. Stevenson. 1981. A directory of primary wood-using industries in Saskatchewan, 1980. Environ. Can., Can. For. Serv., North. For. Res. Cent. Edmonton, Alberta. Inf. Rep. NOR-X-232.

ABSTRACT

In the summer and fall of 1980 a survey was conducted of the primary wood-using industries in Saskatchewan, including sawmills, planing mills, wood treating plants, and pulp, waferboard and plywood mills. Information was collected on mill location, ownership, capacity, wood supply, current production and employment, products, markets, marketing agents, woodlands equipment, mill facilities, and limiting factors for operation and expansion.

RESUME

A l'été et à l'automne 1980, une enquête a été menée sur les industries primaires du bois en Saskatchewan, y compris les scieries et les usines de rabotage, de traitement du bois, de pâtes, de panneaux gaufrés et de contreplaqué. Des données ont été colligées sur l'emplacement des usines, leur propriétaires, leur capacité, approvisionnement en bois, production et l'embauche actuelles, leurs produits, marchés, agents de commercialisation, leur équipement forestier, leurs installations ainsi que les facteurs limitatifs de leur exploitation et de leur expansion.

INTRODUCTION

Most of the information in this directory was collected during the summer and fall of 1980 by staff of the Northern Forest Research Centre through interviews with personnel of Saskatchewan's primary wood-using industries. The data collected in this survey covers one complete year of operation for each company; however, the time period varies between companies (e.g., fiscal vs. calendar year) because of individual operating and accounting procedures. In every instance the basis of the survey is a 12-month period beginning in 1979 and ending in 1980.

In this directory, Saskatchewan's primary wood-using industries are grouped into five activity categories: (1) sawmill-planing complexes, (2) independent planing mills, (3) wood treating plants, (4) miscellaneous wood-using industries (including building timber plants, lath mills, pallet plants, and post operations), and (5) pulp, waferboard, and plywood mills. Also provided are the names of known idle (but potentially productive) sawmills in 1979-80.

Sawmill-planing complexes have been grouped by output into four classes: (1) more than 5 MM fbm, (2) 1 MM to 4.999 MM fbm, (3) 100 M to 999 M fbm, and (4) less than 100 M fbm per year. There has been no attempt to separately describe sawmills and planing mills that function as integrated operations; however, planing mills that operate independently are listed in a separate category.

Information on mill location, ownership, capacity, wood supply, current production and employment, products, markets, marketing agents, woodlands equipment, and mill facilities is provided for each of Saskatchewan's primary wood-using industries. Highlights for 1979-80 include the production of approximately 218 MM fbm of lumber and 107 M bone dry units (2400 lb) of

wood chips by the sawmill industry and 4.3 MM cu ft by the wood treating industry (Table 1). The independent planing mills planed an additional 13 MM fbm, most of which was rough lumber produced by the sawmill industry. Approximately 300 M tons of pulp, 910 MM sq ft (1/16" basis) of waferboard, and 420 MM sq ft (1/16" basis) of plywood were also produced. Saskatchewan's 316 primary wood-using industries and independent log producers created 3623 man-years of employment.

For the convenience of the reader, a list of the abbreviations and definitions used throughout the directory appears on page 8, and an alphabetical index of the primary wood-using industries is provided on page 9. There are also listings of headquarters (Table 2) and regional (Table 3) personnel of the Forestry Branch, Saskatchewan Department of Tourism and Renewable Resources, and personnel of the Department of Northern Saskatchewan (Table 3), associations relevant to Saskatchewan's primary wood-using industries (Appendix 1), metric (SI) equivalents and conversion factors (Appendix 2), and selected conversion factors for timber products (Appendix 3).

Table 1. Saskatchewan's primary wood-using industries in 1979-80, number of firms, and annual production and employment

Industry	Number of firms	Production	Employment in mills and woodlands (man-years)
Sawmill-planing complexes producing more than 5 MM fbm	6	185.9 MM fbm 87.3 M BDU chips[1] 54.2 M cords pulpwood 61.0 M cords peelers	1240
Sawmill-planing complexes producing 1 MM to 4.999 MM fbm	5	9.1 MM fbm 5.2 M cords pulpwood	114
Sawmill-planing complexes producing 100 M to 999 M fbm	60	17.5 MM fbm 3.2 M cords pulpwood	150
Sawmill-planing complexes producing less than 100 M fbm	200	5.9 MM fbm 1.0 M cords pulpwood	68
Independent planing mills	11	12.9 MM fbm	27
Wood treating plants	19	4.3 MM cu ft 13.0 M cords pulpwood	189
Pulp mill	1	304 M tons	1050
Waferboard mill	1	910 MM sq ft (1/16" basis)	325
Plywood mill	1	420 MM sq ft (1/16" basis) 20.0 M BDU chips	205
Miscellaneous wood-using industries	12	7.1 MM fbm	141
Independent log producers	--[2]	--[3]	114[4]
Total	316		3623

[1] One BDU = 2400 lb of bone dry wood chips.
[2] Not listed in the directory.
[3] Production already included in the above industries.
[4] Woodlands employment factor for purchased wood and custom sawn material.

SASKATCHEWAN'S TIMBER ALLOCATION SYSTEM

The province of Saskatchewan has four basic methods for allocating timber to the producers:

1. Forest management license agreement - negotiated agreement with a larger individual forest industry company, with term of operation longer than one year.

2. Timber permit - means of allocating timber to a wide range of different forest industry operations for a period of one year.

3. Forest product field permit - principal means of allocating small volumes of timber to individuals, essentially for their own use.

4. Term cutting agreement - guarantees a timber permit over a specified number of years (up to 10) under negotiated conditions.

ABBREVIATIONS AND DEFINITIONS

Bull rails - 2-4" thick planks with uneven barked edges obtained by cutting slabs from round logs; primarily used for heavy corral construction.

C.F.P.A. - Central Forest Products Association

Coniferous trees

- bF - balsam fir
- bS - black spruce
- jP - jack pine
- lP - lodgepole pine
- tL - tamarack/larch
- wS - white spruce

Deciduous trees

- wB - white birch
- bPo - balsam poplar
- tA - trembling aspen

Custom sawing and/or planing - The mills that provide this service saw and/or plane other industries' logs and/or lumber for a service charge.

Cutting to customer's specifications - This provides the option of allowing the customer to specify what sizes he would like the final product to be in.

Local - pertaining to markets; defined as the area within a 50-mile (80-km) radius

MILL CAPACITY:	Sawmill - 25 M fbm/8 hr shift Planing mill - 30 M fbm/8 hr shift
PRODUCTION 1979-80:	Lumber - 2 MM fbm
PRODUCTS:	Dimension lumber - 2x4 - 25%, 2x6 - 25%, 2x8 - 6%, 2x10 - 3%, 2x12 - 3% Board lumber - 1x4 - 14%, 1x6 - 14%, 1x8 - 3%, 1x10 - 1%, 1x12 - 1%, random lengths, rough and dressed Timbers - 5%
SPECIES UTILIZED:	jP
WOOD SUPPLY:	Private
AVERAGE LOG HAUL WOOD TO MILL:	45 miles
YEAR MILL WAS CONSTRUCTED OR REBUILT:	1971
AVERAGE EMPLOYMENT MONTHS OF OPERATION:	WOODLANDS: Contract - 6 J F M - - - - - - O N D MILL: 11 - - - A M J J A S - - - OFFICE/ SALES: 1 - - - A M J J A S - - -
TRANSPORTATION:	INPUTS: Truck PRODUCTS: Truck
MARKETS:	Central Saskatchewan - 65% Local - 35%
SPECIAL SERVICES:	Unit strapped

WILFRED A. ANDERSON
(continued)

MEMBERSHIPS:	None
USAGE OF WOOD RESIDUES:	Slabs, edgings - no use, piled Sawdust shavings - no use, piled
WOODLANDS EQUIPMENT:	None
MILL FACILITIES/EQUIPMENT:	Stationary sawmill - planing complex 1 - 48" circular headsaw 1 - Edger 1 - Trim saw assembly 1 - Planer 1 - 846 Volvo loader 1 - 4430 John Deer tractor loader
LIMITING FACTORS FOR OPERATING AND EXPANSION:	Market fluctuations
ESTIMATED REPLACEMENT COST OF BUILDINGS, FIXED AND MOBILE EQUIPMENT:	$200,000
REGION:	Prince Albert

SAWMILL-PLANING COMPLEXES
100 M TO 999 M FBM

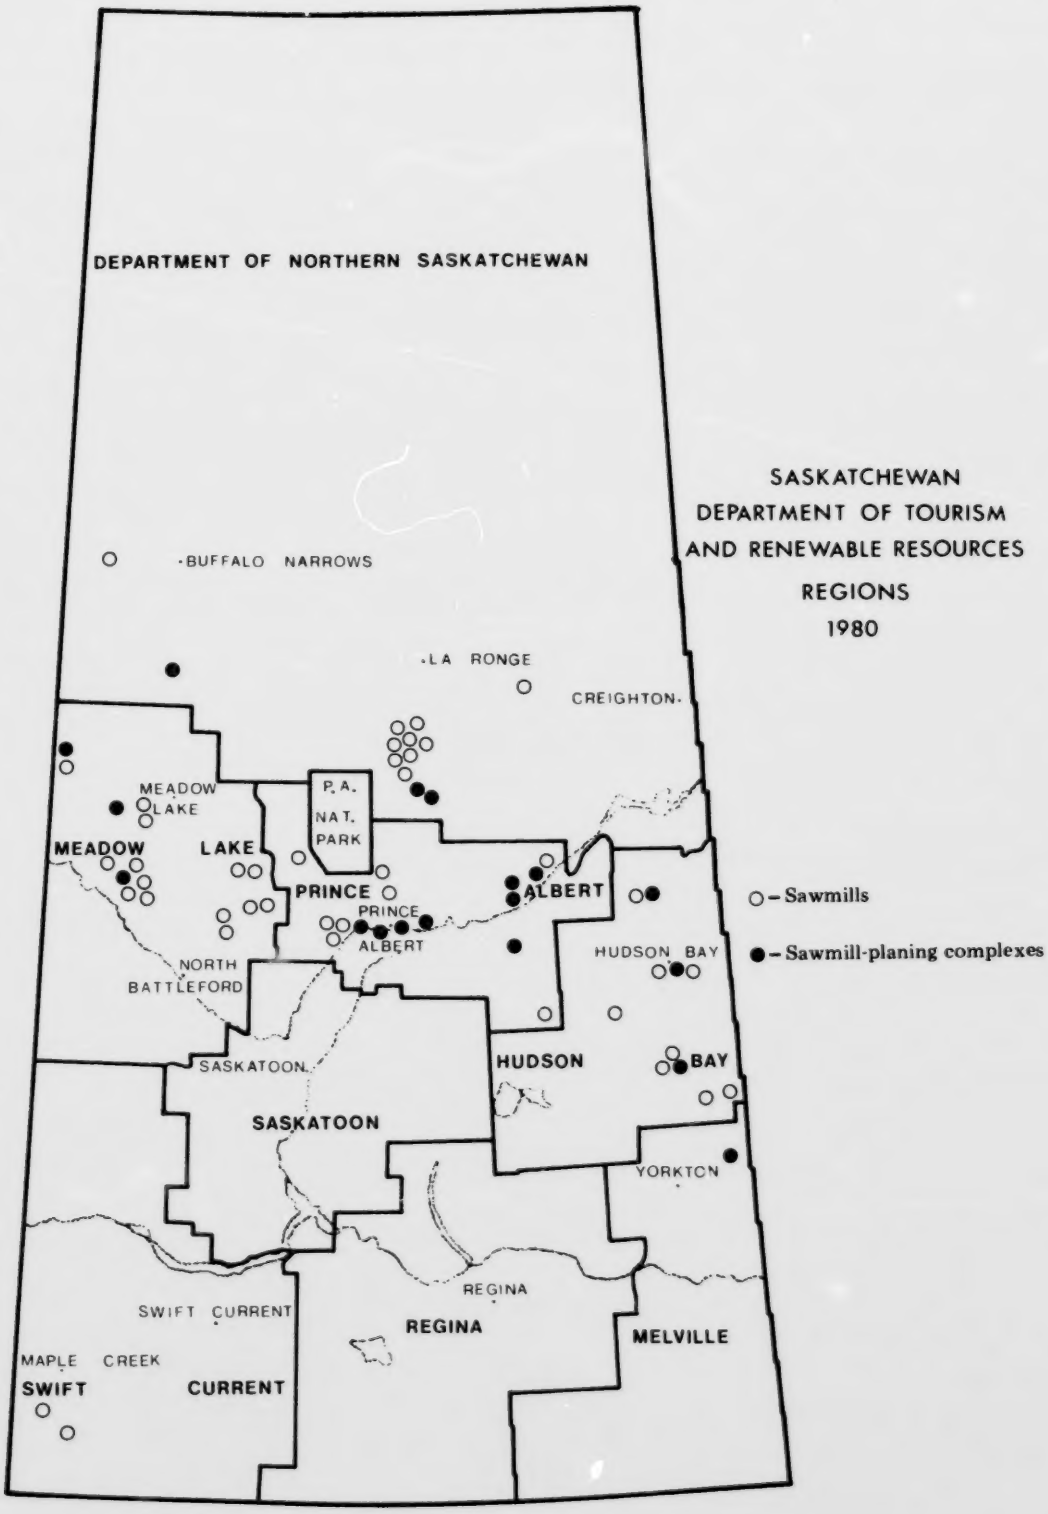

Figure 3. Location of sawmills producing 100 M to 999 M fbm per year.

ACKNOWLEDGMENTS

The authors wish to express their thanks to the headquarter's staff, field foresters, and conservation officers of the Forestry Branch, Saskatchewan Department of Tourism and Renewable Resources, and staff of the Department of Northern Saskatchewan for assistance in locating firms and individuals and to Arnold Steusser of the Central Forest Products Association for assistance in arranging field interviews. The assistance of V. Kolabinski, C.L. Rentz, and J.R. Gorman in helping complete the field interviews is gratefully acknowledged.

White Spruce Lumberman's Association of Saskatchewan
c/o Ed Olchowy
Box 326
Birch Hills, Saskatchewan
S0G 0J0
Telephone: (306) 749-3317

APPENDIX 2

SELECTED METRIC (SI) UNITS AND CONVERSION FACTORS[1]

Imperial	Metric (SI)
1 inch	2.54 cm
1 foot	0.3048 m
1 yard	0.9144 m
1 chain (66 ft)	20.1168 m
1 mile	1.6093 km
1 square inch	6.452 cm^2
1 square foot (ft^2)	929.0304 cm^2
1 square mile	2.590 km^2
1 gallon	4.546 L
1 ton (2000 lb)	0.9072 t
1 bone dry unit (2400 lb) (BDU)	1090 kg
1 cubic foot (ft^3)	0.0283 m^3
1 acre	0.4047 ha
1 cubic foot/acre	0.0701 m^3/ha
1 cord (85 ft^3 solid wood)	2.407 m^3
1 cord (128 ft^3 stacked wood)	3.6246 m^3
1 cord (stacked/acre)	8.9560 m^3 (stacked/ha)
1 cunit (100 ft^3 solid wood)	2.8317 m^3
1000 board feet	4.29 m^3 (roundwood)
1 ft^2 of sheet product (1/16" basis)	0.147 m^2 (1 mm basis)

APPENDIX 3

SELECTED CONVERSION FACTORS FOR TIMBER PRODUCTS

The conversion factors used for this directory are approximate values only and are based on certain generalizations and assumptions. The true value may vary depending on tree size (diameter and height), species, manufacturing practice, log rule, saw kerf, etc.

Timber product	Equivalent value
Fence posts: (per piece)	
6' x 3 1/2" top diam.	0.4 cu ft
6' x 4 1/2" top diam.	0.7 cu ft
6' x 5 1/2" top diam.	1.0 cu ft
7' x 3 1/2" top diam.	0.5 cu ft
7' x 4 1/2" top diam.	0.8 cu ft
7' x 5 1/2" top diam.	1.2 cu ft
8' x 5 1/2" top diam.	1.3 cu ft
8' x 6 1/2" top diam.	1.8 cu ft
8' x 7 1/2" top diam.	2.4 cu ft
8' x 8 1/2' top diam.	3.2 cu ft
Fuelwood (cord)	80 cu ft
Lath	
1 bundle (50 pieces)	9 fbm
Power and telephone poles	9 - 30 cu ft depending on size
Railway ties	
Grade #1 (7" x 9" x 8')	42 fbm per tie
Grades #2, #3 (6" x 8" x 8')	32 fbm per tie
Roundwood	
1 cord (4' x 4' x 8')	515 fbm 85 cu ft (solid wood equivalent) 128 cu ft (stacked wood)
1 cu ft	6.26 bd ft
